

THE DAY AT OLYMPIA

School Land Near Cities To Be Sold in Lots.

AN ADDITIONAL SECTION PASSE

Articles—The County Subsidy Scheme
Defeated for the Last Time

The president in the chair.
Prayer by Rev. Chaplin of Olympia.
At the roll call there were thirteen vacant
chairs.
The records were read and approved.
Gosworo Dunbar and Tibbetts were excused
for the afternoon.
Brown submitted the report of the special com-
mittee on state seal, with three designs for a seal
from the three members on the committee. Table
temporarily and ordered printed.
The session was adjourned.

The next amendment was Turner's declaration of the state's sovereignty over tide lands and on concurrence in this amendment Jones called for the yeas and nays result--next 51 yeas 21 nays 28.

The next point of difference was upon the proposition to exclude from sale of school lands the value of improvements thereon. Casgrove said it was confiscation but the convention either did not agree with him or else were in a confiscating mood for they adopted the proposition *yeas, 48 nays 18.*

The full committee showed to pass and to pass, so the committee was confirmed.

All the other amendments made by the committee of the whole were concurred in.

FURTHER AMENDMENTS.

Land Near Cities Is to Be Sold in Lots
Prosser Again Defeated.

The gates were now wide open under the rule for the usual stream of amendments.

Joy moved to amend so that the whole act of appropriation, any part of which is within

Griffitts thought this wouldn't accomplish the result sought, particularly at Spokane Falls where the whole school section is just outside the one mile limit.

The outing thing approaching that was the basis of the new school purposes, but that was wholly unnecessary for timber, coal, etc., could be sold no more than the land could be sold. The legislature could not act fairly for in every county there were men of influence who wanted to purchase these lands for their own purposes. As to Bowen's comments he claimed that (Bowen) was not only a liar but a stemmer. He said that the gentleman had admitted on the floor that the primary school money of Michigan had been used to build a state capitol and to pay a

Both asked a question or two which prompted the chair stopped as running in that colloquy. The first question was: "What is the purpose of the individual who administered a trust as Michigan had handled her school lands be would like to have been paid against criminally etc in Michigan. He protested vehemently against putting school lands upon the market in the near future in competition with the cheap lands of the United States and the Northern Pacific railroad and the fact that upon the same land the government to the people, to the children of the future. Congress thought his country well enough protected and they wanted money for schools with

Prosser, Chamberlain's private, along with Chamberlain's secretary, Mrs. M. J. Chamberlain, and a few intimates. He would call a halt there, knowing that the people could, through amendment of the constitution, demand that these lands should be sold if they desired to do so. Money could easily be borrowed for immediate use instead of sacrificing this magnificent heritage for a few thousand dollars that are at present needed in school matters. He demanded the yeas and nays and they were recorded.

It chamberlain would handle these lands just as he would his own and if he owned it he would sell it. He compared dealing with selling, etc.

Michigan and Wisconsin in those days, and probably lower so it was difficult to sell at even a bare price. It was important to provide means for the best management of the money received in the sale.

It was again in the interest of time moved to pass a question on this amendment, and it was agreed to leave it to the committee. The convention showed its want of sympathy with Prosser's proposition by voting it down—yes 22, ayes 13, the roll being called on Moore's demand.

Thereupon moved to amend so that not more than

My Wife's Dress—Small Fire—Missing Man—A. W. Goddard Recovered—Struck by Lightning—Drowning Grounds.

ALBANY, N. Y., Aug. 17.—For some time past the Albany police have been receiving reports of a series of small fires along the river front, which have been attributed to the "Goddard" family.

It was found that some one had been tampering with the gas pipes of the "Goddard" family, and that the fires had been caused by the gas escaping from the pipes.

The "Goddard" family, who are well known in Albany, are now in the city, and the police are making every effort to find the person who has been tampering with the gas pipes.

It is also reported that a small fire broke out in the "Goddard" family's house, and that the fire was caused by the gas escaping from the pipes.

A SINGULAR COINCIDENCE.

William S. Ladd, the banker, had some photographs taken a few days ago at the gallery of B. C. T. Ladd.

As he was in the gallery he was struck by the coincidence that just twenty-five years ago he had some photographs taken by Mr. T. Ladd's father, W. H. T. Ladd.

It is a singular coincidence that the photographs were taken at the same gallery, and that the photographer was the same person.

EAST SIDE SUBURB NOTES.

What Action Will Be Taken About the Proposed Fire Boat.

How Brick To Be Erected—Roadway Repairs—Housing To Be Taken—Not an Antiquarian—Various Miscellaneous Items.

The city council will doubtless take some action at the regular meeting next Monday on the fire boat question, in response to the communication from Portland. Not one has expressed an opinion as to the scheme and all concede that both Portland and Astoria should have a share but all are at sea as to what should and can be done.

East Portland's city charter limits the bonded indebtedness, and the limit is almost reached. It has a bonded indebtedness of \$4,000 but there is now on hand \$10,000 to apply on this indebtedness and it will all be provided for by the time the bonds become due. While this has nothing to do with the fire boat question it shows the financial ability of the city. It is to be hoped some plan may be devised by which the city can do its part. Portland has always responded when help has been needed in the past, and it is not fair for Portland to put a fire boat on the river and let Portland reap the benefits in the protection and yet not do anything. It should be stated explicitly as soon as possible what will be expected from Portland and every effort made to meet the requirement.

NEW BRICK. The plans and specifications for a two story brick to be erected on the corner of Sixth and A streets for W. S. Manning, have been prepared and excavations for the foundation are under way. It will be 30x70 feet, and elegantly furnished in every respect on the first floor for undertaking parlors and on the second floor will be the residence apartments. The building will cost \$7,000. The contract will be awarded soon, and the work will be pushed at once to completion. Judging from the plans the new brick will be the handsomest on this side of the river.

It is reported that the Masons are contemplating building on Fifth and M a brick block. Should this be done two elegant and substantial bricks will be put on a street this year.

YOUNG MEN'S MEETING. Dr. J. M. Patton is the subject on address to be delivered this afternoon at 4 o'clock in the Y. M. C. A. rooms by Rev. J. A. Snodgrass. Young men and strangers are invited.

IT WAS NOT AN EARTHQUAKE. Friday night two hundred sheets were discharged in the neighborhood of Holladay's addition which gave quite a number the impression there was an earthquake.

REPAIRING THE ROADWAY. The street commissioner yesterday put in the day repairing the roadway on Fourth street. A large number of worn and unsafe planks were replaced.

"I mean please. I have a gas escape pipe that releases the gas. A cord that I hold in my hand which regulates our descent. It should break if it cannot, it is solid. The gas should disappear."

"What?"

"The balloon, lost, the balloon filled with hydrogen it will rise to regions where the air is rare. We should be able to apply, it would require two miracles for it to stay, is it not?"

"The effect, yes, in reality, no."

The Conditions of the Past Week Have Been Cooler.

The Rain of Yesterday Was General Over an Inch Falling in Portland—Forest Fires Still Raging—Correspondents' Remarks.

The following report-weather bulletin is compiled from reports received by the Oregon State Weather Bureau co-operating with the United States Signal Service, for the week ending Sunday, August 27.

General weather prevailing during the past week the temperature being about normal.

No general rain occurred except on Saturday when in Western Oregon a light shower was generally experienced. At Portland 0.8 of an inch fell, the first since June 25th.

The smoke continues to obscure the river most of the time. The forest fires continue doing great damage, especially in the Coast Range. In parts of the Cascade range the fires are driving the sheep out and doing much damage to them.

Cascade thunder was heard at Forest Grove on the 15th.

Harvesting is gradually being finished and reports indicate that better yields were had than was expected. Some sections report a fine wheat yield, others a shrunken yield of it. Through the Coast Range and Cascade mountains wheat is yielding from four to twelve bushels per acre.

On account of the almost total failure in the wheat crop in Malheur, Grant and Crook counties, the prices are extraordinarily high, wheat at Elmville selling as high as \$2.50 and at other places it will be \$2.00.

Larger number of bushels of wheat to export than last year. From reports received from Salem it has been shown that a two year old tree has this year produced fine figs.

At Pendleton sorghum presents a fine appearance. Practical experience and tests have demonstrated that sorghum is a valuable crop in certain sections of the state, adding two more products to the already long list and variety.

Reports from the wheat sections of the coast indicate a crop of 100 bushels per acre. In fair prices in Oregon to yield an upward tendency. Prices are firm in Western Oregon from 60 to 65 cents in Eastern Oregon from 50 to 55 cents per bushel.

It is reported to indicate a good yield of fruit. Large quantities are being shipped and all the fruit of the coast is in good condition. Apples in sections are very plentiful and prices are in places somewhat smaller than last year. The weather has been very dry and their crop down July one-third.

Water is very scarce in Eastern Oregon. Along the coast most of the creeks are dry. Wells are giving out and water has to be hauled for all purposes for many miles.

General weather conditions. Weather generally cloudy and cool. Light rain during night of 15th.

Washington County—Forest fires. Forest fires are burning in the Coast Range, the 15th distant to the west. Red Cliff, on the coast, is burning. The fire is burning in the Coast Range, the 15th distant to the west.

WASCO COUNTY—LIVESTOCK.

Hay harvest continues. Good hay very scarce. A large amount of hay is cut for hay in the vicinity. It is the quality of hay, but on account of the great drought everything has to be utilized for feed for the stock.

The country will have less than one fourth crop of hay this year. Many of the smaller lakes in the county which have never been dry since the first settlement of the county by the whites, are dry this summer, among them Swan Lake. The shortage of the hay crop will make the wintering of stock a serious problem.

RACES ON THE WILLAMETTE.

The Annual Regatta of the Portland Rowing Association on August 31.

The Willamettes Have Entered a Crew in the Junior Four Oared Contest and Will Try to Win—Gold and Silver Prizes.

The annual regatta of the Portland Rowing Association which will be held on the afternoon of August 31 promises to be a success.

The amateur associations of the Pacific coast have been invited to participate but the only one accepting is the Willamette Rowing Association of this city which has entered a crew in the junior four oared race. The Aerial club of San Francisco declined to attend on account of lack of time to prepare.

The Willamettes will not be much of a showing this year but they expect to be in fine trim next year. There is some excellent rowing material in the club and the boys propose to buckle down to practice and to make good.

The regatta will commence at 3 P. M. The foot of the river street will be the rendezvous of the rowers. Gold and silver medals will be offered as prizes in all the contests except the tub and swimming races closed yesterday afternoon. There are a few follows.

Richard Porter had lived too long by himself to tolerate interference with his habits and he had been greatly chafed of late that he considered his daughter's extravagance. He was, therefore, not very anxious to have her go to the party.

He was heartily glad to be rid of the child he heard nothing of her beyond an occasional note to say she was well till the widow married a young husband, and then Richard learned that his daughter must come back to him. The girl had now been at home two months, but her father had not got over the

"Come in Lizzie, what's hinderin' ye?"

He said this more pleasantly than could be expected.

Prissy's eyes were extra bright with art and her color was like a China rose leaf.

"Who says I'm forward?"

Richard looked puzzled. He pinched
